Professional Summary

Full Stack Software Engineer with 2+ years of experience heavy web applications and production e-commerce platforms using **React/Next.js**, **Node.js**, **Python**, **JavaScript/TypeScript**, and **SQL/NoSQL** databases. Strong in designing scalable **REST APIs**, building data processing pipelines and automation scripts, and optimizing performance and reliability in live systems. Experienced in collaborating in remote, cross-functional teams and motivated to contribute end-to-end to modern, data-driven web platforms.

Work Experience

Stealth Intelligence, LLC *Junior Software Engineer* Dec 2025 – Present

- Contributing to backend services, internal **APIs**, and automation scripts using **Node.js** and **Python** in a remote, distributed team.
- Debugging production issues, profiling performance bottlenecks, and improving **reliability** of existing systems and internal tools.
- Collaborating with senior **Software Engineers** on system design discussions, code reviews, and incremental refactoring of core components.

Munchies Deliveries Ltd. *Full Stack Engineer* Apr 2024 – Dec 2025

- Developed and maintained customer-facing and internal tools using **React.js**, **Node.js**, and **PostgreSQL**, handling real customer orders and live production data.
- Designed and implemented **REST APIs** for order management, authentication, and third-party integrations (payments, notifications, logistics).
- Wrote optimized **SQL** queries and improved database indexes to reduce slow queries and improve API and page response times.
- Built automation scripts for data cleanup, reporting, and operational dashboards, improving visibility for non-technical teams.

Projects

Vent Sports – Sports Jersey E-commerce ventsports.shop 

- Built a full-stack sports jersey **e-commerce** platform for the Bangladesh market using **Next.js (App Router)**, **TypeScript**, **Supabase**, and API routes.
- Implemented advanced **checkout** and order lifecycle logic: delivery zones, shipping fees, coupons, customizations, COD/advance payments, and automated stock validation/deduction.
- Developed an **admin dashboard** for products, orders, POS, coupons, courier settings, and analytics, including sales/profit reporting, event tracking, and courier API/webhook integration with fraud-check rules.

SymptomSeek – AI Medical Assistant [symptoseek-backend](#) 

- Built backend services that accept symptom inputs, call **machine-learning** models in **Python**, and return disease predictions with risk scores.
- Designed **APIs** for doctor recommendations, emergency alerts, and appointment workflows, persisting structured data in **MongoDB** using **Node.js**, **React**, **TypeScript**, and **Python**.

Technical Skills

- Programming Languages:** **Python**, **JavaScript**, **TypeScript**, **PHP**, **C/C++**, **HTML**, **CSS**
- Backend & Data:** **Node.js**, **NestJS**, **REST APIs**, **API Routes**, **Webhooks**, **Automation Scripts**, **Data Pipelines**, **Object-Oriented Programming**, **Data Structures**
- Frontend:** **React**, **Next.js**, **Redux**, **Tailwind CSS**
- Databases:** **PostgreSQL**, **MySQL**, **MongoDB**, **Supabase**
- Tools & Domains:** **Git**, **GitHub**, **Firebase**, **Vercel**, **Jira**, **Figma**, **Docker**

Education

United International University Jan 2020 – Oct 2025

BSc in Computer Science and Engineering

- **Coursework:** Software Architecture, Software Engineering, Human-Computer Interaction, Data Structures
